

## What is the 'Event' ?

The 'Event' is when the rising of the planetary frequencies will be accompanied by the planned mass arrests of the worldwide criminal cabal, politicians, big bankers and others who have committed numerous crimes against humanity. This will happen in a legal manner, and the accused will be given fair trials. As a result of this legal action there will be a worldwide reset of our financial system, of our energy and food production, our media, and the whole structure of society in general. Clean technologies which had been previously suppressed by big corporations will be released, the natural abundance of this planet will be distributed for everybody, our eco-systems cleaned and this planet, along with all its inhabitants, finally healed and liberated.
